

REINJECTABLE PREDIMAX IMPER SYSTEM

Description

Injectable pipe in PVC with a double coating and openings spread asymmetrically to inject materials suitable for sealing construction joints in underground structures.

Composition

- Re-injectable pipe Ø 11 or Ø 19 in PVC for cements and resins.
- White end piece.
- Red end piece.
- Connector.
- Junction box.
- Small caps clamp.

Application

The pipe will be applied in the construction joints using suitable fasteners or inserted in the partitioning joints with specific housing.

The pipe must be supplied with the necessary complementary elements.
