FLASHING DETAILS

multifunctional
waterproofing
paste

FLASHING DETAILS is a ready-mix mono-component waterproofing paste based on special elastomers and selected bitumen in water dispersion reinforced with specific fibers

STRENGTHS

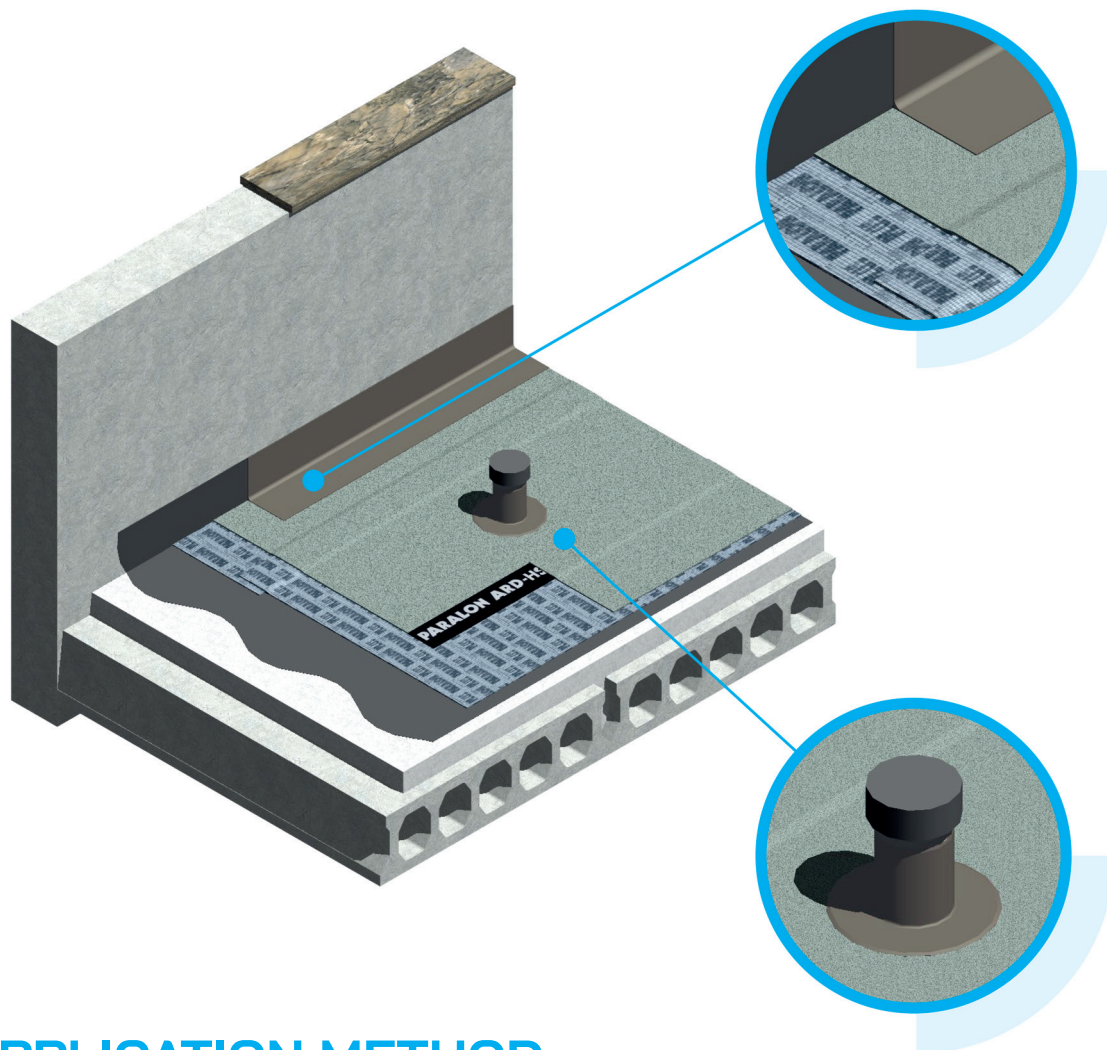

- ⦿ IDEAL FOR FITTINGS AND CONSTRUCTION DETAILS
- ⦿ HIGH ADHESION ON ALL SUPPORTS
- ⦿ FLEXIBLE AT LOW TEMPERATURE
- ⦿ NO DRIP AT HIGH TEMPERATURE
- ⦿ RESISTANT TO PONDING WATER
- ⦿ NO NEED REINFORCEMENT
- ⦿ UV RESITANT
- ⦿ NO NEED PRIMER
- ⦿ HIGH THIXOTROPY
- ⦿ WATER BASED

1 - 5 - 20 kg Buckets

FLASHING DETAILS paste is an excellent waterproofing product, that has been designed to be used in the following cases:

- Waterproofing of upstands, edges, **fittings and construction details**, instead or in combination with modified bitumen membranes
- **Protection and sealing of metal surfaces** (corrugated metal sheets, gutters, etc.)
- Protection and sealing of emerging elements (Poles, pipes, outlets, aerators, etc.)
- Repairing of old bituminous membranes

APPLICATION METHOD

1. Assure that the surfaces to be treated are smooth, clean and dry, free of oil, dust and debris and assure that the roof has a proper slope.
2. Apply by brush (250 gr/linear meter) a coat of FLASHING DETAILS between the vertical and horizontal edges.
3. After 3-4 hours, in relation to the atmospheric conditions, apply by brush or roller a coat of flashing details paste on the entire surface to be treated.
4. After 24 hours, apply another coat, by brush or roller, a final coat of flashing details paste (1 kg/m²) and then wait for the drying time before being walkable and before applying any eventual protective color coat, if required.
